Innovative Approach to Kid's Cybersecurity Education: Empowering and Inspiring Educators for the Next Generation

SCENARIO 1

Emma celebrates her 12th birthday with all her classmates. During the party, Emma wants to post a photo from her birthday party on the internet. In the background, you can see the front of her house with the address visible on the mailbox. Also, Emma edits the photo and adds a note to it "Elm School is having great time!". Emma posts the photo.

SCENARIO 2

Daniel is 12 years old and he enjoys playing real-time games online. He solves missions and observes strategies applied by other players. In the game, players can communicate in the dedicated chat to share ideas or express emotions. During a gaming session a player who calls herself Alice contacts Daniel. She claims that she is 11 years old and they chat about the different strategies that they use. Alice asks: "What school do you go to?" and "Who is your class teacher?" Daniel answers the questions.

SCENARIO 3

Sofia is doing her homework on her tablet. Her task is to research on the internet for information about the population of owls, beavers, and wolves in the European continent. Whilst she is searching for information on websites a notification pops up that says: "Congratulations! You won a free gift: a random item – a notebook with a lock, headphones, a table game, or coupon to play the online game. Enter your name, email address, and home address to receive it." Sofia is very excited about this and clicks on the notification and enters her name, email address, and home address.

SCENARIO 4

Liam is in a class group chat. Someone shares a screenshot from some platform with a situation where another classmate is in the photo, and the shadows add illusionary association to make it appear that the person has rabbit ears. The screenshot also includes the classmate's username, profile photo, and part of a phone number. One member in the class group chat suggests posting the screenshot on social media because "it's funny" and does that.
