

SEVEN

INDICATORS

1

COMPUTER SLOWS DOWN

The computer is hardly processing anything, but the user has to wait a long time for any application to appear on the screen.

2

COMPUTER MAKES NOISES

Computers sometimes make strange noises, as if heavy work were being done, or the user can hear a high-pitched noise indicating that the computer is very busy cooling down.

3

WINDOWS POPUP

The computer is opening windows or pop-ups on the screen without the request of the user.

4

NEW ICONS APPEAR

On the desktop of a tablet or a computer, icons for programs the user has never seen or requested appear.

5

PROGRAMS CLOSE RANDOMLY

The program the user is using closes at random, and the user experiences irregular repetition of this.

6

FILES DISAPPEAR

The files of the user are damaged or deleted without the user's knowledge.

7

EMAILS ARE SENT

The emails are sent from the user's account.
